Alfaro C, Wallace M: Origin and classification of springs and historical review with current applications 112

Basu A, Molinaroli E: Toxic metals in Venice lagoon sediments: Model, observation, and possible removal 203

Berg RC, Abert CC: Large-scale aquifer sensitivity model 34

Belousova AP, Shmakov AI, Galaktionova OV: Ways of investigating radionuclide migration processes in the lithosphere and hydrosphere 306

Bin L, Yanqing L, Qi W, Zhengping S: Isotopic studies for the rational use of water resources in the front plain of Tianshan Mountain 217

Bollhöfer A, Mangini A, Lenhard A, Wessels M, Giovanoli F, Schwarz B: High-resolution ^{210}Pb dating of Lake Constance sediments: stable lead in Lake Constance 267

Bustamante de I, Temiño J: Vinasses purification model in carbonated materials by low-cost technologies: An example in the Llanura Manchega (Spain) 188

Das BK, Singh M: Rate of sediment accumulation in lakes of Udaipur, Rajasthan, India, using the ^{210}Pb method 28

Eaton GP: Ecosystems and environmental earth science 309

El-Bihery MA, Lachmar TE: Groundwater quality degradation as a result of overpumping in the delta Wadi El-Arish area, Sinai Peninsula, Egypt 293

George LD: Uses of springwater 125

Gupta LP, Subramanian V: Environmental geochemistry of the River Gomti: A Tributary of the Ganges River 235

Håkanson L: Models to predict water chemical cluster variables 61

Hrkal Z, Trouillard JM: Use of GIS for optimalization of human activity in a catchment area: An example of the Beauce region (France) 22

Huang W-Y, Uri ND, Hansen L: Assessing a farmer's decision concerning the application timing of nitrogen fertilizer 43

Hudak PF: Effective porosity of unconsolidated sand: Estimation and impact on capture zone geometry 140

Ii H, Misawa S: Groundwater chemistry within a plateau neighboring Matsumoto city, Japan 166

Kellaway GA: Environmental factors and the development of Bath Spa, England 99

Lahermo PW, Tarvainen T, Tuovinen J-P: Atmospheric sulfur deposition and streamwater quality in Finland 90

Mantei EJ, Sappington EJ: Heavy metal concentrations in sediments of streams affected by a sanitary landfill: A comparison of metal enrichment in two size sediment fractions 287

Morales-Juberias T, Zafra P, Olazar M, Antigüedad I, Arrate I: Modeling solute transport in river channels using dispersion theory 275

Motyka J, Witczak S, Zuber A: Migration of lignosulfonates in a karstic-fractured-porous aquifer 144

Ravi Chander DV, Venkobachar C, Raymahashay BC: Retention of fly ash-derived copper in sediments of the Pandu River near Kanpur, India 133

Rovery II CW: Assessing flow systems in carbonate aquifers using scale effects in hydraulic conductivity 244

Rybach L: Depth domains of environmental geophysics 7

Sidle RC, Farmer EE, Williams BD: Subsidence and rock creep in a cross-valley fill 159

Skowronck F, Sagemann J, Stenzel F, Schulz HD: Evolution of heavy-metal profiles in River Weser Estuary sediments, Germany 223

Subbarao C, Subbarao V: Delineation of effluent contaminated zones by electrical surveys at two industrial sites in Visakhapatnam, India 281

Swennen R, Van Keer I, De Vos W: Heavy metal contamination in overbank sediments of the Geul river (East Belgium): Its relation to former Pb-Zn mining activities 12

Tijani M'N: Hydrogeochemical assessment of groundwater in Moro area, Kwara state, Nigeria 194

Wendland F, Albert H, Bach M, Schmidt R: Potential nitrate pollution of groundwater in Germany: A supraregional differentiated model 1

West CC, Lyon WG, Ross DL, Pennington LK: Investiga-

tion of vertical distribution and morphology of Indigenous organic matter at Sleeping Bear site, Michigan 176

Williamson RB, Hume TM, Mol-Krijnen J: A comparison of the early diagenetic environment in intertidal sands and muds of the Manukau Harbour, New Zealand 254

Woo NC: Pb on groundwater particles, Door County, Wisconsin 150

TITLE INDEX

Original papers

Assessing a farmer's decision concerning the application timing of nitrogen fertilizer: Huang W-Y, Uri ND, Hansen L 43

Assessing flow systems in carbonate aquifers using scale effects in hydraulic conductivity: Rovey CW II 244

Atmospheric sulfur deposition and streamwater quality in Finland: Lahermo PW, Tarvainen T, Tuovinen J-P 90

Comparison of the early diagenetic environment in intertidal sands and muds of the Manukau Harbour, New Zealand: Williamson RB, Hume TM, Mol-Krijnen J 254

Delineation of effluent contaminated zones by electrical surveys at two industrial sites in Visakhapatnam, India: Subbarao C, Subbarao NV 281

Depth domains of environmental geophysics: Rybach L 7

Effective porosity of unconsolidated sand: Estimation and impact on capture zone geometry: Hudak PF 140

Environmental factors and the development of Bath Spa, England: Kellaway GA 99

Environmental geochemistry of the River Gomti: A Tributary of the Ganges River: Gupta LP, Subramanian V 235

Evolution of heavy-metal profiles in River Weser Estuary sediments, Germany: Skowronck F, Sagemann J, Stenzel F, Schulz HD 223

Groundwater chemistry within a plateau neighboring Matsumoto city, Japan: Ii H, Misawa S 166

Groundwater quality degradation as a result of overpumping in the delta Wadi El-Arish area, Sinai Peninsula, Egypt: El-Bihery MA, Lachmar TE 293

Heavy metal concentrations in sediments of streams affected by a sanitary landfill: A comparison of metal enrichment in two size sediment fractions: Mantei EJ, Sappington EJ 287

Heavy metal contamination in overbank sediments of the Geul river (East Belgium): Its relation to former Pb-Zn mining activities: Swennen R, Van Keer I, De Vos W 12

High-resolution ^{210}Pb dating of Lake Constance sediments: stable lead in Lake Constance: Bollhöfer A, Mangini A, Lenhard A, Wessels M, Giovanoli F, Schwarz B 267

Hydrogeochemical assessment of groundwater in Moro area, Kwara state, Nigeria: Tijani M'N 194

Isotopic studies for the rational use of water resources in the front plain of Tianshan Mountain: Bin L, Yanqing L, Qi W, Zhengping S 217

Investigation of vertical distribution and morphology of Indigenous organic matter at Sleeping Bear site, Michigan: West CC, Lyon WG, Ross DL, Pennington LK 176

Large-scale aquifer sensitivity model: Berg RC, Abert CC 34

Migration of lignosulfonates in a karstic-fractured-porous aquifer: Motyka J, Witczak S, Zuber A 144

Modeling solute transport in river channels using dispersion theory: Morales-Juberias T, Zafra P, Olazar M, Antigüedad I, Arrate I 275

Models to predict water chemical cluster variables: Håkanson L 61

Origin and classification of springs and historical review with current applications: Alfaro C, Wallace M 112

Pb on groundwater particles, Door County, Wisconsin: Woo NC 150

Potential nitrate pollution of groundwater in Germany: A supraregional differentiated model: Wendland F, Albert H, Bach M, Schmidt R 1

Rate of sediment accumulation in lakes of Udaipur, Rajasthan, India, using the ^{210}Pb method: Das BK, Singh M 28

Retention of fly ash-derived copper in sediments of the Pandu River near Kanpur, India: Ravi Chander DV, Venkobachar C, Raymahashay BC 133

Subsidence and rock creep in a cross-valley fill: Sidle RC, Farmer EE, Williams BD 159

Toxic metals in Venice lagoon sediments: Model, observation, and possible removal: Basu A, Molinaroli E 203

Use of GIS for optimalization of human activity in a catchment area: An example of the Beauce region (France): Hrkal Z, Trouillard JM 22
Uses of springwater: George LD 125
Vinasses purification model in carbonated materials by low-cost technologies: An example in the Lianura Manchega (Spain): de Bustamante I, Temiño J 188
Ways of investigating radionuclide migration processes in the lithosphere and hydrosphere: Belousova AP, Shmakov AI, Galaktionova OV 306
